Education

Birla Institute of Technology Mesra

Ranchi, Jharkhand

B. Tech Computer Science

2021 - 2025

- Coursework: Data Structures & Algorithms, Software Engineering, Computer Networks, Cryptography, AI/ML, Operating Systems, Database Management

Experience

VXO Digital

Remote

Software Developer Trainee Intern

July 2025 – Current

- Developed and maintained full-stack features using **Angular (frontend)** and **Java Spring Boot (backend)** for enterprise business modules such as Orders, Opportunities, and MOM (Minutes of Meeting).
- Implemented and integrated **RESTful APIs** between Angular and Java backend, handling complex data flows, validations, and error handling.
- Built and integrated an **AI-powered Resume Parser**, enabling automated resume extraction and candidate profiling within the core platform.
- Worked extensively with **SQL queries and backend business logic** for CRUD operations, data mapping, and transaction workflows.
- Followed agile practices and version control workflows using **Git**, collaborating closely with the engineering team for code reviews and feature rollouts.

Here Technologies

Mumbai, Maharashtra

Data Engineering Intern

Jan 2025 – July 2025

- Developed Python-based data pipelines to detect bypass lanes from geospatial features
- Engineered graph-based spatial ML workflows; integrated backend support for edge features (distance, bearing)
- Enhanced internal **Node.js** visualization tool by dynamically linking road topology with traffic elements
- Collaborated on scalable pipeline design for large-scale geospatial datasets

Projects

URL Shortener & Analytics System (Spring Boot)

Current

- Built a Bitly-like URL shortening service using Java Spring Boot and relational database.
- Implemented **short URL generation logic** with collision handling and fast redirection using RESTful APIs.
- Designed backend architecture for **link creation, retrieval, and redirection workflows**.
- Integrated **database layer (JPA/Hibernate)** for storing original URLs, short codes, and access metadata.
- Developed **REST APIs** for URL creation, lookup, and redirection with proper validation and error handling.
- Implemented basic **analytics tracking** (click count / usage data) for shortened URLs.

Skills

- **Languages:** Python, JavaScript, Java, SQL, HTML/CSS
- **Backend:** Angular(basic), Node.js, Spring Boot, REST APIs
- **Dev Tools:** Git, Docker (basic), Postman
- **ML:** PyTorch, Numpy, Pandas, GeoPandas
- **Cloud & Deployment:** AWS EC2, Render (basic), GitHub Actions

Certifications

AWS Cloud Practitioner Essential | Amazon

Ongoing

Achievement

- Advanced to Round 3 of Tata Imagination Challenge 2024, competing against 1,096,490 participants with 7,123 remaining.
- Advanced to Round 2 of Luminous Techno-X Techathon 2024, from 95,127 registered participants to 1,631 (Top 2%)
